- home
  - ceramics
  - worktop joints
  - flat roofs

## compatible with

wood / rubber / glass  
hard plastics / metals  
fibreglass / ceramics  
existing sealant / stone  
brickwork / concrete

## nautical ingenuity

first developed for boat leaks by sailor Peter Tolley in 1986. Now used for fixes across land and sea

- 1** .... Crack must be less than 0.8mm wide, dry & grease-free
- 2** .... Apply sparingly at 30min intervals until filled
- 3** .... Rapid absorption indicates large leak, so check for drips
- 4** .... Wipe off any excess immediately with a damp cloth
- 5** .... Allow 24hrs for complete curing. Repeat if needed

**PRECAUTIONS** Remove wet splashes immediately from skin and fabrics using a damp cloth. If cured on hard surfaces remove with white spirit/turpentine. If product enters eye, wash thoroughly with water. If discomfort continues, seek medical advice. Do not swallow. Keep out of children's reach. Do not freeze. Contains 2-methylisothiazol-3(2H)-one; 1,2 benzisothiazol-3(2H)-one and Bronopol EU limit for this product (cat A/I): 140g/l – Capt. Tolley's: 40g/l VOC
